Coverage of the nonzero effect (truth = 0.40)
Returned intervals for each method; denominators differ and are shown above the points
Low, balanced
Negative correlation
Small, short
Low, larger N
High reliability
Unequal information

Coverage (displayed range: 50−100%)
Dashed line: nominal 95% coverage. Bars: 95% Wilson Monte Carlo intervals. Labels give the number of intervals.
All plotted points and Monte Carlo bounds are shown; no uncertainty bars are clipped.
